

A 200

Folding size

Disassembled

Stowed in a Smart

Individual Adaptation

The A200 is part of the new power wheelchair family from Otto Bock and is compatible with the components and the optionally adjustable seating system of the B500, B600, and C1000 for individual adaptation. This not only optimizes the service friendliness, which is part of the A200 mobility concept, but also facilitates

logistics. Additional options such as the mounting kit for headrests, angle adjustable aluminum footplate and mechanically elevating legrests complement the mobility concept. The fact that the entire electronic system is located in a single box also contributes to easy disassembly of the A200.

Battery pack removal

Quick clamp for seat angle adjustment

Control panel, swing-away in parallel

Curb-climbing assist

Product Features

- Individually adaptable
- Can be disassembled – the heaviest component weighs 22 kg
- Overall width of 57 cm
- Easy to service
- Seat inclination of 0, 3, 6°
- Very good maneuverability
- 31 Ah C20 gel batteries
- Puncture-resistant tires
- Optional control panel holder, swing-away in parallel

Frame Colors

silver metallic
